

Volbeat "7 Shots"

Visit "[7 Shots](#)" on MotoLyrics.com

Down on his knees he sees the devil
Weeping, whinging his tongue
Mr Cadillac doesn't even know
He's been fighting his own

He's been trying shooting
All the angels devils inside
Playing around with the good
And the evil in his mind
Alone in the desert and cold, so cold

Driving back to the ten house city something is wrong
He found the killer weapon in his car on the floor
Delusional the blood lost paint his mind in a cave
Feeding monsters in the back of his head

Killer, ripper, who are you?
Take a look into the mirror then you will know
Heaven fire up my blood
I'm waiting for something that's better

Welcome to a world of chaos
You've been caught in the light
Saw the door to the ten house tale
7 shots in the night

Standing in the dark and shaking my own hand for a
while
Saw the angel devil vanished out in the light
Breathing new air for a day to begin
Soulless body with an empty shell

Killer, ripper, who are you?
Take a look into the mirror then you will know
Heaven fire up my blood
I'm waiting for something that's better

The price was high to pay
And the memories are all crying like a child
A reason for all the blood that leaked
And a call up for the wild

Follow me to relentless street
Where all pain and love will die
7 shots in the body fakes
Well, the loaded mind

Driving back to the ten house city something is wrong
He found the killer weapon in his car on the floor
Delusional the blood lost paint his mind in a cave
Feeding monsters in the back of his head

Killer, ripper, who are you?
Take a look into the mirror then you will know
Heaven fire up my blood
I'm waiting for something that's better

The price was high to pay
And the memories are all crying like a child
A reason for all the blood that leaked
And a call up for the wild

Follow me to relentless street
Where all pain and love will die
7 shots in the body fakes
Well, the loaded mind

Welcome to a world of chaos
You've been caught in the light
Saw the door to the ten house tale
7 shots in the night
