One lucky bastard finds it's way for picking up a
Brand new fire rose
All the days of wine and pitiful lie, the pitiful rhymes
Were all a long time ago

That's the way it all will end
Die alone you never will
Hell is here unleash your tail

Well the lord above has never been on my side or
Your side, Hallelujah Goat
Walking through a fire like a soldier
Kicking the door, and kicking the devil's whore

That's the way it all will end
Die alone you never will
Hell is here unleash your tail

Heaven where did you go
People are searching, searching for love
So easy blaming the horned
Man kind the sinner
Forever it burns

Well the lord above has never been on my side or
Your side, Hallelujah Goat
Walking through a fire like a soldier
Kicking the door, and kicking the devil's whore

That's the way it all will end
Die alone you never will
Hell is here unleash your tail

Heaven where did you go
People are searching, searching for love
So easy blaming the horned
Man kind the sinner
Forever it burns
