Evacuate now, now, now!  
Evacuate now, now, now!  
Evacuate now, now, now!

Every day we're fightin',  
And we're causin' bolts of lightnin',  
Like a hot and cold<sup>1</sup> collision in the sky.

Illegitimi non carborundum<sup>2</sup>.  
If you cared, there'd be love in the a-a-a-a-air.  
Pharmaceuti-government  
Got your mind and your thoughts.  
Can you feel?  
Where's your spine?<sup>3</sup>

Evacuate now , 'cause  
This storm's out for blood.  
Build a shelter for your kind,  
And protect the ones you love.

It seems that  
Every day we're fightin',  
And we're causin' bolts of lightnin',  
Like a hot and cold collision in the sky.

It seems that  
Every day we're fightin',  
And we're causin' bolts of lightnin',  
Like a hot and cold collision in the sky.

You think your fellows, co-conspirators,  
Got your back,  
When the fear they dispatch  
Comes from a diffident path<sup>4</sup>.  
What of then?  
Opponent ready to pass?  
When the clouds clear  
We'll be standing here.

Get down in your basement.  
These sirens are loud.

Lock the doors and eat the key,  
To elude the things you'd see.

Take notice!  
Everybody's frightened by the  
Radically enlightened.  
And they say to jump  
Still, you reply "How high?"  
Evacuate now, 'cause  
This storm, it is out for blood.  
Build a shelter for your kind.

Evacuate now, now, now!  
Evacuate now, now, now!

Every day we're fightin',  
And we're causin' bolts of lightnin',  
Like a hot and cold collision in the sky.

It seems that  
Every day we're fightin',  
And we're causin' bolts of lightnin',  
Like a hot and cold collision in the sky.

Get back in your basement,  
Or bury your head in blankets.  
Unless you now believe in wakin' up,  
'Cause this fight will outbreak all over you.

Evacuate now, now, now!
