I wanna, I wanna drown you in a pool of blood  
And I wanna, I wanna fix you like a hawk  
But I never had guts, no thanks I'm without it's touch  
Soft money, soft looks, soft until you stop  
Untangle/untether your wings and fly to the sheltered  
sky  
No money, no voice/poise, no bullet to chain  
Cold water rush inside me like a seepin' die  
Clear colder in place of what you became

Oh I'll just fight now, relock and release,  
I thought you'd always be my brother in conflict  
Drawls, bees, it's just the son and the beast  
I thought you'd always be my brother in conflict, now

Shake body, shake fingers, shake fists, shake a lot of  
things  
Shakin' myself all over the floor  
Such really great moves I had, oh I thought I'd sing  
My voice all wrecked and ragged before  
I turned my back on beauty, it's a manmade crime  
Most are, most were, will do it again  
Blood money, blood money, blood money, it's a  
manmade lie  
Conquest, conflex, call me to the end  
Of all this

Fight now, relock and release,  
/]  
I thought you'd always be my brother in conflict  
Drawls, bees, it's just the son and the beast  
I thought you'd always be my brother in conflict, now

I don't see, I don't see, I don't see anything  
Take the car, take the cash, take the heat out of me  
Every day, every day losin' my sympathy  
I don't see, I don't see, I don't see  
Oh, this

Fight now, relock and release,  
I thought you'd always be my brother in conflict

Drawls, bees, it's just the son and the beast  
I thought you'd always be my brother in conflict

Right now, it's just the thing that we need  
I thought you'd always be my brother in conflict  
Drawls, bees, it's just the son and the beast  
I thought you'd always be my brother in conflict, now

I don't see, I don't see, I don't see anything  
Take the car, take the cash, take the heat out of me  
Every day, every day losin' my sympathy  
I don't see, I don't see, I don't see

Why we  
We took an axe  
and thrust it in the sunshine  
And through the glow, I lost you for the first time  
And when it cleared, I hit you with a fast line  
Why are you suffocating both of us now?  
We picked a lot of trust over the wrong things  
The freedom of our speech, and I'm just talking  
What will I learn, how to chew/choose these words  
I have teeth, I have teeth, I have teeth  
I, have to lose my idols to find my voice  
lose my idols to find my voice  
I have to lose my idols  
to find my voice  
I have to lose my idols to find my voice  
lose my idols to find my voice  
I have to lose my idols  
to find my voice
