Number six may sence you  
I stood outside and watched a million years go by

Dream love come into me easy  
Washed out and breezy  
The rivers occur  
Beneath the sky lines  
Swallowed up by towers  
Too many hours  
Spent eating the world  
Oh what a country  
Brought me to a clearing  
Direct upon hearing  
The beautiful song  
Of progress sweeping like a shimmer  
Develop and simmer  
The fever is gone

Cause there's a hole in the pocket where the money ran  
out  
At the time it was better I believe you  
But it was grace under fire, there's no reason to doubt  
You had a blast.....didn't you

Hard rain boils underneath me  
I want you to teach me  
Whatever you learned  
Of all the secrets, harboring desire  
Professional fire  
Which passively burns  
Oh what a waste of  
Beauty and retention  
We don't ever mention  
The grit and the grime  
But I still trust you  
I will always love you  
Don't let the papers  
Unravel your mind

Cause there's a hole in the pocket where the money ran  
out

At the time it was better I believe you  
But it was grace under fire, there's no reason to doubt  
You had a blast.....didn't you

And tell me what was it like, and how did it feel  
Who breaks a butterfly, on a wheel  
Robert took the rap and spent 10 months in jail  
We had to lie.... to lie

Sometimes I feel like all my heroes are dying around  
me  
And all my answers are the questions and dreams  
I have to shake myself, to the voices that hold me  
I have to dream.....waking

But maybe when I breathe my last, I'll be steadied by  
reason  
To throw my nerves at the wall of the earth  
Oh don't you leave me here  
No direction and vision  
We have to trek.....slowly

And I will throw.... caution bravely to the wind  
I'll cut myself  
Free from burning stretched within  
I'll have no self  
Greater than the thing I am  
And we drift, we drift like sound  
And beauty breaks our ears again  
We drift, we drift like sound waves  
We drift like sound waves

Take a long walk carpal stone and city  
Did you used to run it  
Did you used to show  
I had a long day, trying to remember  
Breathing in silence  
And breathing it out
