I just saw your ghost
Walking on the streets of L.A.
Made me feel alive,
A taste of what I felt with you that day
And all the colors get you high
Up on a bridge beneath the sky
Children of the earth learn to fly

A killer is born
A killer is born

Adam of the earth
Feeling every world around me
Life under the drug
Highs that knocked you down on your knees
Now you crawl
A child's been unwound
Oh, you got so high you'll never come down

We're going back in time
We're going back in time

Adam of the earth
Feeling every world around me
Life under the drug
Highs that knocked you down on your knees

I just saw your ghost
Walking on the streets of L.A.

A killer is born
