There you go, do you know
What you do to me

When you move around the room
Like some sweet Melody, you move me

So we dance, while the Band
Plays a song or two

You just keep on,
And I'm gonna have to Love You

You just keep on turning me on baby
So easily, so gracefully
You're drivin me crazy

Once again, you've drawn me in
And my heart knows it's true.

You just keep on
And I'm gonna have to love you

Here you are, in my arms
Better watch your step

You could cause a man to fall, and I
Don't need no help, your something else

Heaven knows, you are so close
What else can I do

You just keep on
And I'm gonna have to love you
