Throw the switch down now, it's never felt so alive, take
a snapshot of my
Mind, what's hidden inside, you'll know soon,
inhibitions gone
Mind, on the outside, go slow slow, now put to its best
use.

She touches me, in ways i've never ever seen, she
touches me

Mind, manipulate time, I swallow, time to catch my
breath
Mind shifting time, don't go home, I'll put to its best
use.

She touches me, in ways i've never ever seen, she
touches me

It's time to wake up from this, you've suffered long
enough
No longer running from it, you suffer long enough.

It's never felt so alive, take a snapshot of my
Mind, what's hidden inside, you'll know soon,
inhibitions gone
Mind, on the outside, go slow slow, now put to its best
use.

She touches me, in ways i've never ever seen, she
touches me

It's time to wake up from this, you've suffered long
enough
No longer running from it, you've suffered long
enough.
