Visit "[Love Is Love](#)" on [MotoLyrics.com](http://MotoLyrics.com)

Love is love and love is everything  
Love is love is when you're by my side  
Love is love and love is not enuff  
A little voice inside the cries

C'mon my friend forget your pride  
You need someone to help you come and hide  
To get away from this fatal flight  
C'mon my friend don't let me out of sight

Love is love it's love everytime  
Far away we can feel alright  
Love is love love is everything  
I believe in love forever with you

Love is love and love's our daily bread  
Love is love can't get it out of my head  
Love is love is nothing without you  
Love is love is everything you do

C'mon my friend forget your pride  
You need someone to help you come and hide  
To get away from this fatal flight  
C'mon my friend don't let me out of sight

Love is love it's love everytime  
Far away we can feel allright  
Love is love love is everything  
I believe in love forever with you
