"Take Off"

Visit "[Take Off](#)" on MotoLyrics.com

The waits too much
Much too long i've waited fix and blush
By myself and now my minds made up
And you're all these walls speak of
Cause seven months is a long time

I get mixed feelings from the talk and the anger
And even more i've got a burn for concern
You know it's not another notch in the bed post

Break down permission to take off
Gave out license to cross
Big star in the sky
Big sparks fly
Count down permission to take off
Come on lets get involved
Big star in the sky
Big sparks fly

Walk with me
On a street with a spot light theme
To the corner of what could be
And you'll see just what I mean
You're damn right i'm a lunatic

I guess there's always been a sore trust issue
But if we jump we know a six parachutes
Taking the safe from you is all that I ask for

Break down permission to take off
Gave out license to cross
Big star in the sky
Big sparks fly
Count down permission to take off
Come on lets get lost
Big star in the sky
Big sparks fly

She went about effort full and pleasing, with true
understanding
My seniorita from a b rate spanish movie

She's so convincing, she's so convincing, she's so convincing...

Break down permission to take off
Gave out license to cross
Big star in the sky
Big sparks fly
Count down permission to take off
Come on lets get involved
Big star in the sky
Big sparks fly

She went about it effort full
She went about it effort full
and pleasing
big sparks fly
count down come on
count down come on
big sparks fly
big sparks fly
