I wanna be your friend wanna let you in  
I want everything everything everything  
I wanna be the one wanna show you love  
My baby  
Just take my hand now follow me  
Baby ill treat you just like a celebrity  
I can get you what you need  
I can be your everything  
And I can get you what you need  
I can be your everything  
Now is the time for this thing called love  
We can be romantic and aim for above  
Skies will fall at the sight of us  
Get that heart beating get that heart beating baby  
Get rid of the dust  
Got that feeling back oh got that feeling back  
Get rid of the dust  
Got that feeling back oh got that feeling back  
Got that feeling back from the last time you stabbed  
me in the back  
Yea yea I got it back  
I can get you what you need  
I can be your everything  
Lets go right now  
We gotta do this right we gotta do this right somehow  
yea  
Just take my hand now follow me  
Baby ill treat you just like a celebrity  
I can get you what you need  
I can be your everything  
And I can get you what you need  
I can be your everything  
They say that theres many many fish in the sea  
But only one of them sticks out to me  
Ill see you next September if you know what I mean  
I can get you what you need  
I can be your everything
