Music by Hatakka-Waltari

I am free to do whatever I want to

I am free to soar like a bird

I don't live for this society

Only depression of the minds I see

You're my soul salvation!

Take me to your different world

Take me to the unknown of this life

You feel the passion and you kill your pain

You see the light, the death is all the same

You don't need the nations and you don't need rights

You leave your history of endless fights

You're my soul salvation

(look at me, look at me, I'm flying on the street...)

FEEL! FEEL!

FEEL! FEEL!

You're my soul, like a bomb and today we run!

Soul salvation!

FEEL! FEEL!

FEEL! FEEL!

Don't you know that you are very small

But this world is big and this world is tall

Your life can't be decided by this mess

You just have to shake away your stress

You're my soul salvation

(look at me, look at me, I'm flying on the street...)

You're my soul, like a bomb and today we run!

Soul salvation!
