Stop the world let me get off the world I don't wanna
live in a world without you
Once you told me that you loved me that your love
would be forever true
And my heart believed you when you said no other love
would ever do
Now you say you love another now you say our love can
never be
My world is lonely lonely lonely for one and only my
world has ended for me
So stop the world let me get off the world I don't wanna
live in a world without you
Remember when you told me that no other love would
ever win your heart
You were mine forever and that never come a day
when we would part
So I built my dreams around you now my dreams are
just a memory
My world is lonely lonely lonely for one and only my
world has ended for me
So stop the world let me get off the world I don't wanna
live in a world without you
So stop the world let me get off the world I don't wanna
live in a world without you
