(Goldstein/Simmonds)

rooftop cameras monitoring the streets
cancer causing chemicals in the food you eat
zero population the family is banned
frustration suicide, it's part of the plan
genocide, kill the old, ain't useful anymore
no more resources, we'll have to go to war
corporation/government they're run by the same
start thinking for yourself you'll get in the way
no dreams - left for you
no dreams - nothing to do
no dreams - inside your, inside your bed got
no dreams
unemployment, no enjoyment is your legacy
machines don't go on strike don't need you or me
television valiums keep you of the streets
so don't talk to strangers you might find the truth
sirens singing in the night
police riot - a show of might
the rich stay in cause they can't afford to be safe
ya got no money so you're in the race
stop scheming - stop screaming - stop dreaming too
