peters audio letters believe in what they say  
he warned us of the cosmospheres that wiped the USA  
partule beam weapons came bouncing off the moon  
of operation table top, battle of the harvest moon  
dr beter, peter beter, dr beter  
his claims are even more amazing than at first appears  
the rockefeller murders, assassinations through the  
years  
you watch your bruised and battered world in your  
vacuum jaws  
your robotoid president lost the third world war  
many men took part in it, four set the stage  
politicians and the pope, you would be amazed  
the rockefeller dynasty, the mid-east oil trick  
ft knox gold, all was stoled, by the bolsheveks  
only thirty seconds the message will begin  
his information service of all the world sins  
the actor pope conspiracy, can't learn it off the tube  
send off now, don't be late you've everything to lose
