Ooh...

Was it the way that you move  
That suggested to me  
Was it the way that you took my hand  
That indicated to me  
Was it the holes in your shoes  
That revealed to me  
Was it the way that we talked the night to day  
That showed me, that showed me

That I want you, I want you, I want you  
I want you, I want you, I want you  
In my life

Ooh...

Was it the kind of records that you play  
That made me think  
Was it just the way that you kiss kiss kiss kiss kiss kiss  
kiss kiss kiss me  
That showed me

That I want you, I want you, I want you  
I want you, I want you, I want you

Don't promise me that you will stay  
Let's take the chance to walk away  
The time before the sad sunrise  
Please don't say that it's forever  
Or that we belong together  
'Cause all I really know for now

Is that I want you, I want you, I want you  
I want you, I want you, I want you  
In my life

Ooh...
