All the way
That's the way I go with you
Please don't stop don't you know
For my heart there is no return

Every day - every night
I stay with you
It's the only way to happiness
For me and you.

When you smile
It's the light of day
Stay with me please don't go away
All night long till the light of day
You and me that's the only way.

All the way
...

All that I want is to keep me satisfied
Close your eyes and let you turn
The feeling reach me deep inside

All the way
...
You sweet love makes me feel so warm
When you take me into your arms
Such a kick to feel you next to me
Just can't hide what it has to be.

Just can't hide what it has to be.

All the way
