Follow your Road

With so many roads that seem to lead down to the sea
I wonder which road will be the right one for me
Others may fall away, dead ending left and right
But there is this one road that journeys far out of sight

Have you wondered where your road will lead you?
Maybe to a bright day of sunshine or a starry night in
heaven
Or it might be you're afraid to go afraid to go,
But you've got to follow your road or you'll never know,
never know

We are all but travellers living in a foreign land
Trying to find our way the best as we can
Looking for an answer trying to find some way
Though we have journeyed far it's not quite far enough

Have you wondered where your road will lead you
Maybe to a song that needs singing or summer rain
(don't be afraid to go)
Or it might be afraid to go, afraid to go
You got to follow your road or you'll never know

Chorus:
You got to follow your road, follow your road, follow
your road
You got to follow your road, follow your road, follow
your road
You got to follow your road, follow your road, follow
your road
And maybe someday your road will take you far away
(3X)

You know when you will find it
And someday you will get there
Don't be afraid
w/ love (xoxoxo)
