Killing time

Watching signs

I'm waiting

See on the other side of town

I've seen the walls come tumblin' down

So I've come here to make you shake

So get up get up, get up get up

Come on, come on/

Come on why don't you come on

Chorus

When east meets west

There's gonna be one hell of a mess

When east meets west

There's gonna be one hell of a mess

When east meets west

There's a finger/on the trigger of a very troubled mind

Working for the love of satan

There's no blisters on his fingers

There's no blood on his clothes

But I've seen the world that he's been making

So get up, get up, get up, get up

Come on come on come on why don't you come on

Chorus

When east meets west

There's gonna be one hell of a mess

When east/meets west

There's gonna be one hell of a mess

When east meets west

Solo

So get up, get up, get up, get up

Come on, come on, come on

When east mets west

There's gonna be one hell of a mess

When east meets west

There's gonna be one hell of a mess

When east meets west

When east emets west

There's gonna be one hell of a mess

When east meets west

There's gonna be one hell of a mess

When east meets west
