(Clarke)

The cash flows out The drugs roll in
The nation rage While the children sin

Officials addicted to dough The bankers grin
But we all know They can't stop it
'Cause they're lining their pockets

We're blown away in the U.S.A.
We're blown away every single day

They can't stop it 'Cause they are buying
Their rockets

We're blown away in the U.S.A.
Overseas They love our green
Keep us happy With your little machines

We live on credit We live on dope

There's no promises When you're living on
hope

We're blown away in the U.S.A.
We're blown away every single day
Kiss the sunshine
