### "Twenty Twenty"

Visit "[Twenty Twenty](#)" on MotoLyrics.com

Time flies when you have fun  
But when the world falls down you turn and run  
Like it's over now, over now  
But there's more to Who you say you know  
And it's your own fault your faith won't  
show  
Like it's over now, over now  
And it's your time

Your time though no signs seem congruent  
You'll find the design plays into it  
Time to let this go, you never had control  
We can look back to when He was there for us

Take all that you have learned when you were on your  
face  
Now it's your turn to give it out, give it out  
Looking back to when the lights went out  
There never was a reason for you to doubt  
And it's over now, over now  
And it's your time

Your time though no signs seem congruent  
You'll find the design plays into it  
Time to let this go you never had control  
Look back home weary soul  
Recall the times of old to face the new  
Your faith will overcome  
We can look back to when He was there for us
