Waiting for the revolution

New clear vision - genocide

Computerize god - it's the new religion

Program the brain - not the heartbeat

Onward all you crystal soldiers

Touch tomorrow - energize

Digital dreams

And you're the next correction

Man's a mistake so we'll fix it, yeah

Take a look at your own reflection

Right before your eyes

It turns to steel

Chorus:

There's another side of heaven

This way - to technical paradise

Find it on the other side

When the walls fall down

Love is automatic pleasure

Virtual reality

Terminal hate - it's a calculation

Send in the child for connection

Take a look at the toys around you

Right before your eyes

The toys are real

Chorus

Midnight confessions

Never heal the soul

What you believe is fantasy

Your past is your future

Left behind

Lost in time

Will you surrender

Waiting for the revolution

Program the brain

Not the heartbeat

Deliver us to evil

Deny us of our faith

Robotic hearts bleed poison

On the world we populate

Virtual existence

With a superhuman mind

The ultimate creation

Destroyer of mankind

Termination of our youth

For we do not compute

No !
