"Clouds"

Visit "[Clouds](#)" on MotoLyrics.com

This morning I woke up to a grey sky
No not outside but in my mind
So I turned on the water to wash it away
But it stayed all day
And I had no choice but to hear
The clouds and what they say
And they told me
Chorus:
The sun shines from down inside
Don't blame us for the tears you cry
'Cause it shines from deep inside
Step aside and let it rise
They followed me around
Dark shadows on the ground
Teasing me with fear
Raining in my ear
And I cried and I tried to run away
But they stayed all day
And I had no choice but to hear
The clouds and what they say
And they told me
Repeat chorus
Now every time
I feel rain in my head
I remember the clouds that spoke to me
- they showed me the way
To make my own day
As bright as I want it to be
