Looking in, can it be real
Heads turn as your dreams Dance By
Its not your fault, now everyones to blame
Can you see the picture now?

Push it back push in front of him
Take a chance take something new
When you say to me

Look at you self, you got nothing to be
Take a look in side your future
Look at your friends and theyve all got to see
Whats the perfect time for now?

You being something that you not
Youre being something that youve never planned

Push it back push in front of him
Take a chance take something new
When you say to me

Look at you self, you got nothing to be

Push it back push in front of him
Take a chance take something new When you say to
me
