"I Feel You"

Visit "[I Feel You](#)" on MotoLyrics.com

Fortunately I've been blessed

Blessed with love and happiness

(Happiness)

Who'd have known a soul so....

Pure could reach and save my loneliness

(Loneliness)

When i think that,

Day to day i live a life so full of complications

So put by the thought of lies

But i just smile (But i just smile)

At the thought of you (At the thought of you)

By my side

Everyday my hopes evolve

When i see you

Now all around, my world is whole

I've no need to be insecure, i'm self-assured

Everytime i feel you,

I feel you

People fall and lose their way

Beacause of you i'll know, i'll stay

(Know i'll stay, i know i'll stay)

Guided by our love

I'll always have a reason to pave our way

(Lovin' is leading the way)

Never give up on your lovin'

You're the one that keeps my heart growin'

Never give up on your lovin'

You're the one that keeps my heart growin' grownin'

Day to day i live a life so full of complications

So put by the thought of lies

But i just smile (But i just smile)

At the thought of you (At the thought of you)

By my side

Everyday my hopes evolve

When i see you

Now all around, my world is whole

I've no need to be insecure, I'm self-assured

Everytime i feel you,

I feel you

Everyday my hopes evolve

When i see you

Now all around, my world is whole

I've no need to be insecure, I'm self-assured

Everytime i feel you,

I feel you

Never give up on your lovin'

You're the one that keeps my heart growin'

Never give up on your lovin'

You're the one that keeps my heart growin' grownin'

Never give up on your lovin'

You're the one that keeps my heart growin'

Never give up on your lovin'

You're the one that keeps my heart growin' grownin'

Everyday my hopes evolve

When i see you

Now all around, my world is whole

I've no need to be insecure, I'm self-assured

Everytime i feel you,

I feel you

Everyday my hopes evolve

When i see you

Now all around, my world is whole

I've no need to be insecure, I'm self-assured

Everytime i feel you,

I feel you
