"If You Want To Party"

Visit "[If You Want To Party](#)" on MotoLyrics.com

Come on, now, ooh-hoo-hoo-hoo, start it
If you're stuck, gather round, everybody get down
It's time for the best party track in town
Kicking it live, keeping it real
Arriving on time, yeah, you know how we feel
You've gotta get up and move side to side
You've gotta release, and do it right
It's a funkadelic beat to a funkadelic song
Still kicking it live with the main man, John
Saints in the house, you've been doing it right
Cool rock and jam - party all night
So let's get started, baby, you and I
Go on with your bad self, dance all night
So can you feel it, I can feel it, hey
Can you feel the beat? Got the bass drum doing in your feet
Hear the snare drum tapping in your ear
Yeah, you've gotta get up, gotta move your rear
Next, the way this heart is feeling for you
Cos noone does it better
No, there ain't no doubt just what I wanna do

So won't you let me switch on

Let's get started, If you wanna party

Baby it's just you and me

I got what you need

Don't conceal it, tell me can you feel it

Won't you let me lead the way

Cos I wanna be your baby for life

Ooh, come on everybody

If you hear a party, get down, get down

Ooh, if it's gonna take all night

Mr DJ, save my life

Come on and get down

[Chorus]

So on and on and on, on and on and on

Checkit, checkit, check it out

To the breaka, break of dawn

As the bass drum stick it to your ear

Can you hear? Move your rear

Wind your body to the beautiful snare

Guys grab a girl, and take her from the back

Give it up, give it up, cos we like it like that

Girls grab a guy, showing that you make it

Feeling shy, keep it going as the bridge comes, keep
time

(Next, the way this heart is feeling for you)

If it's right, we could be

Start it up, you and me

Get it on, what I need

DJ play that song for me

(No, there ain't no doubt just what I wanna do)

Time is right, in the mood

Stepping with the old school

Lets get, let's get, hey

Oh yeah, let's get started

I said baby, ooh-oh, somebody gonna treat me right

(Let's get)

Let's get started, If you wanna party

Baby it's just you and me

I got what you need

Don't conceal it, tell me can you feel it

Won't you let me lead the way

Cos I wanna be your baby for life

(Hey Mr DJ, won't you play that song? We go on and on)

(I got what you need, it's just you and me)

[Repeat to fade
