Take the key and you'll find lovin you makes me feel
I hold the key in my heart you know it's true
When love time is right I shall give it a give it to you a
I never want another love your the only one I'm thinkin
of
I don't want you easily I know that you see
I never felt this way before want this feeling forever
more
The way you do the things you do you run me over
Got me goin' out my mind think about you all the time
Open up the doors to mine take the key and you'll find
All my feelings are for real baby cause and I will feel
Cuz I want you just to know loving you makes me feel
In times despair the way I feel would be unconditional
Eternal ever-lasting oh you know I feel complete
I never want another love your the only one I'm thinkin
of
I don't want you easily I know that you see
I never felt this way before want this feeling forever
more
The way you do the things you do you run me over
Got me goin out my mind think about you all the time
Open up the doors to mine take the key and you'll find

All my feelings are for real baby cause and I will feel
Cuz I want you just to know loving you makes me feel
I never want another love your the one I'm thinkin of
Your a true trooper super kewl number one hun

Falling over scampi a true all fantasy telling normal lies
