Some Other Way
(Peter Lewy)

I woke up and saw you, lying there
I wondered did you fall, from heaven
There's no hole in the cieling, no glass on the floor
Must have been some other way you came in
Must have been some other way you came into my life

How did you find me, how did you know
Did you look in my eyes, did you look in my soul
Was it a word that I said, was it a song that I sang
No, Must have been some other way you came in
Must have been some other way you came into my life

You, your the only one who knows it
It's your secret, take it to the grave

I woke up and saw you, lying there
I wondered did you fall, from heaven
I just folded your wings, and pulled up the blanket
Must have been some other way you came in
Must have been some other way you came into my life
