

Watchtower "Meltdown"

Visit "[Meltdown](#)" on MotoLyrics.com

There's an air of urgency, the wail of sirens pierces the night
The damage has already been done, irreversible
accidents, security's tight
This is not a drill, it's a drastic tragedy to cope with
Time is the worst enemy, to those who play with the fate
of man
Breakdown warning-nuclear nightmare, reality
Breakdown, warning-contaminates society
Breakdown, warning-radioactive atmosphere
Breakdown, warning-mistakes are now becoming clear
Meltdown-becomes a word of panic
Meltdown-radiation burns the skin
Meltdown-the public has yet, to be informed
Meltdown-invisible killer closing in...
Geiger counters crackle in a frenzy, useless meters to
prove our danger
An enemy that man created, how ironic that he cannot
fight
Technology beyond control, build up of waste no safe
disposal
