"Never Met Her"

Visit "[Never Met Her](#)" on MotoLyrics.com

I've never met her, and I don't mind

I've seen her face a thousand times

She hides behind her hair

I wonder if her love is like mine

Face up, I'll face the day

Three weeks, you flew away

I'll never blame her

I'll never let you make me hate a girl that way

Touch down, I hear the score

I watched you slide out through the backdoor

I've never met her, but when I do

I'll thank her from saving me from you
