Take me I am yours
You don't have to beg and plead
When I'm finished with our body

She's a brain
She's a brain
She's a brain

She is not quite what I wanted
She is not quite what I needed
Someone said she was cerebral
But I don't know what that means
Please explain

She's a brain
She's a brain
She's a brain

Take me I'm yours
Take me I'm yours
She said, Take me I'm yours
And you know that really floored me
When she's finished with my body
She says she's going to pour it down the drain

She's a brain
She's a brain
She's a brain
