You're the pearl in the quicksand
You sink without a sound
I'm the girl with the tiny hands
Planted on the ground
You're the dream and I'm the dreamer
I'll dream you're still the clouds
See the sun falling down (x4)
You're the bleach
Where everything went black
The relief I found
You're the sliver of hope in my lap
You're soft, warm, brown
See the sun falling down (x4)
Good night moon, good night mush
Good night lady saying Hush
Good night moon, good night mush
Good night lady saying hush
See the sun falling down (x8)
