I was awake I overheard your speech.
My ego dried and sank.
Talked with your ex and we agreed
thought of your sister helped us wank.
I'm sure you know that I have fancied her since she
began high school.
But back in then, and I will promise I will let your engine
cool.

I have matured, I've come of age, My visions clear.

But there's still some things that I don't want to hear.
And I know that it was probably just those E's, but be a
bit more thoughtful next time, please.

While I'm alive, well, I just drive.
Each time I scored I just got bored.
And that's no bollocks ... I am just a slut.
