Look into my life  
Don't have much to say  
You will follow me  
Every other day

That night I closed my eyes  
How could it be so clear?  
Like you were so alive  
In front of me you standing there

The beach beneath our big old tree  
Your silhouette in summer dream  
Now I wake to autumn leaves  
I hear you whisper  
It won't be long

Chorus

A way  
You'll hear me, you'll feel me the same  
Together we will be again  
Be strong in your stance don't hesitate  
You'll follow me  
I hear you I call out your name

Na na na na na

Faces watching me  
Try to make me change  
You can carry me  
Our rivers are the same

Tied within the photo frame  
Hold our time in this domain  
I look at you in paper shades  
I'm singing for you in every song

Chorus
