You say I'm narcissistic and cold hearted, well yeah,  
maybe  
But I don't give a damn about you, this much is true  
My vision's blurry and my thoughts are hazy baby  
I know I'm stupid so I must be smarter than you

Keep your advice, leave me alone and don't rattle my  
cage  
Just let me wallow in my own chigones, rattle my cage  
I'm known to bite the hand that feeds me so don't rattle  
my cage  
I'm bossly in row, now everybody starin' at me cold,  
rattle my cage

Do I look like I want to be bothered  
Like I care about the glow  
My life's a comode, I like my depression a-la mode  
On the road, get off my back about my health  
I like disease, I'll still be around when y'all are feeding  
trees  
I don't want your speech or your sound advice  
Don't like people who seem nice  
Talking in my head like a family of lice  
Just let me wallow in my rage  
Don't clean up my droppings and don't rattle my cage

Keep your advice, leave me alone and don't rattle my  
cage  
Just let me wallow in my own chigones, rattle my cage  
I'm known to bite the hand that feeds me so don't rattle  
my cage  
I'm bossly in row, now everybody starin' at me cold,  
rattle my cage

Keep your advice, leave me alone and don't rattle my  
cage  
Just let me wallow in my own chigones, rattle my cage  
I'm known to bite the hand that feeds me so don't rattle  
my cage  
I'm bossly in row, now everybody starin' at me cold,  
rattle my cage
