We drink from the same glass  
We share the same past  
The time, long ago  
You told me that I should know

It's hard  
No matter what you do  
My guard  
Was always up for you

The job is never done  
A kiss just for fun  
Our flood waters are gone  
Our blood brothers are strong

It's hard  
No matter what you do  
My guard  
Was always up for you

I'll slip you underneath  
Between the grip of your teeth

It's hard  
No matter what you do  
My guard  
Was always up for you

It's hard  
No matter what you do  
My guard  
Was always up for you

It's hard  
No matter what you do
