Lightning has now gone through my heart
And I can't go back through the wall of time

My daily experiences are engraved on my body
Oh I'm freezing

Breaking the delicate balance by ripping off the mask
My actions cannot be hidden Oh No No No

Satoshi-
Though no one can be told
The secrets of the past that we harbor

Chorus-
These words are layered upon your wings to hide the
wounds
Right back to you!
If you are an angel
Right back to you!
Your voice searching for love, is frozen in the night
Right back to you!
The only one I believe in is you

Aiba-
A collapsed alibi is unusually
A easy game of selfishness

Sho-
Don't worry about (Right about time) looking inside the
mirror

Jun-
Where have we lost the key
To our memories (Start remembering)

Comin right back to you!
These words are layered upon your wings to hide the
wounds
Right back to you!
If you are an angel
Right back to you!

You voice searching for love, is frozen in the night
Right back to you!
The only one I believe in is you

Sho-
The seasons are right again Bounce baby
Freaky freaky freaky night dance baby
We touched each others hands and raised them
Mayday mayday
For the sea of light Thanx baby

The next evening is not yet completely gone
Nevertheless, I understand your reasons for escaping

Sho-
Lead everybody and venture out into the universe
I'm comin right back to you!

Right back to you!
These words are layered upon your wings to hide the
wounds
Right back to you!
If you are an angel
Right back to you!
Your voice searching for love, is frozen in the night
Right back to you!
The only one I believe in is you
Right back to you!

Your voice searching for love, is frozen in the night
Right back to you!
The only one I believe in is you
