You want me to say I love you too
There's nothing in the world, I'd rather do
You will never know how hard I've tried
But I can't change the way I feel inside

It's nothing that you did or haven't done
Who knows what makes somebody love someone
I wish that's the way that we could be
But love is up to love and not to me

I can't help the way that I don't feel
Take what isn't there and make it real
You're where I should be going but my heart is at the
wheel
And I can't help the way that I don't feel

It's nothing that you did or haven't done
Who knows what makes somebody love someone
I wish that's the way that we could be
But love is up to love and not to me

You want me to say I love you too
There's nothing in the world, I'd rather do
You will never know how hard I've tried
But I can't change the way I feel inside

I can't help the way that I don't feel
Take what isn't there and make it real
You're where I should be going but my heart is at the
wheel
I can't help the way that I don't feel
