OIL, THAT LOVELY CRUDE

Whose the man behind the man

behind the gun?

what's behind the Iraqi deal

Halliburton anyone!

Wake up America

you are being royally screwed

left, front and center

right out of your blue suede shoes

alternative fuel, don't be a fool

just look at all that oil

waiting for us to lap it up

where it's under Iraqi soil

one hundred and twelve

billion barrels of crude

that makes for a princely sum

enough for us top guns to share

including number one

but you'll never get really filthy rich

Just being a CEO

so don't be a silly son of a bitch

lets strike a mighty blow  
lets hit Saddam that evil man  
and make us a lot of dough  
For our millions are merely a bagatelle  
when you consider Iraqi oil  
that humongous amount  
that'll blow your mind  
that's under Iraqi soil  
we'll get rid of Saddam  
and take over the Biz  
then each of us can build  
a palatial palace with faucets of gold  
that's so much bigger than his  
it's bound to happen there'll be boys killed  
that's what happens in a war  
but face the facts, that can't be helped  
that's what the troops are for.
