

Plain End

"At least two of us knows how to say goodbye"

Visit "[At least two of us knows how to say goodbye](#)" on MotoLyrics.com

Like science fiction
you enter without prediction
an understatement
can you feel my torment?

A cascade of razors
I wrote this with erasers
like a thousand miles
your list of denials

come with me and act with me
you'll see that everything will crash around us
If you wanna come, then play along
you know that everything that's bad surrounds us?

You haunt me, chose me
you taunt me, I know you hate me
like a fire, burning
like a liar, yearning

come with me and act with me
you'll see that everything will crash around us
If you wanna come, then play along
you know that everything that's bad surrounds us?

come with me and act with me
you'll see that everything will crash around us
If you wanna come, then play along
but you know that everything that's bad surrounds us?

come with me and act with me
you'll see that everything will crash around us
If you wanna come, then play along
but you know that everything that's bad surrounds us?
