I've got this craving  
Also this nervousness inside  
That this could be the night  
I'm not so crazy  
Picture the world through my eyes  
And don't say that I'm wrong  
This could be the night

Chorus:  
Oh oh  
This could be what I needed  
Oh oh  
This could be the night I waited for  
And if the time is right  
This could be the night

It seems like so long  
Pressure - I've felt it from all sides  
And this could be the night  
This dream can't be wrong  
The media sells it all the time  
That this could be the night  
This could be the night

Chorus:  
Oh oh  
This could be what I needed  
Oh oh  
This could be the night I waited for  
And if the time is right  
This could be the night

I know  
I know

This could be the night (x13)
