It won't go away  
These aching memories still dance around me  
Spilling over everything with beauty  
I see your face in everything before me  
Your voice is haunting me

I belong with you now  
Oh please give into me  
And stay forever  
Oh don't leave me behind

So afraid of dreaming  
The story is repeating  
Screaming, monsters and bleeding  
I'm losing light in myself  
Come back into me  
Cause only you can save me

I belong with you now  
Oh please give into me  
And stay forever  
Oh don't leave me behind

I belong with you now  
Oh please give into me  
And stay forever  
Oh don't leave me behind
