I can't breathe in the space that's filled with your sound  
Can't call a spade a spade in this town  
Dug a hole now I can't get out  
I can't figure it out

Keep your head up high keep mine deep in the ground

Hide away the love that I've found, built a wall now I  
can't get round  
I can't figure it out

Always on my mind

I can feel you now  
Don't think I can find you this time

You can tell on me I can tell on you too

Act as though you have forgotten all the trouble you  
have gotten  
Into my dear, don't believe it's you

Always on my mind

I can feel you now

Don't think I can find you this time
