All of my days your shadow puppets dance on each
service,

and I confess I wish I could dance with them

and I must run to the next task on this long list

where you must thrive and push and pull and always
persist

Wish I could be timeless (3x)

and I confess I wish that I could dance with them

Hide from the sun hide from the moon and just sit
silent
and then you fly by high and happy like a bird

Wish I could be timeless (3x)

and I confess I wish that I could dance with them

Please I say please don't trap me down this time (4x)

Timeless

Wish I could be timeless
