Title: Come around

-----

None of baby's friends  
Can figure out what she wants  
Guess it just depends  
On the benefits and the costs

She won't come around  
She won't come around

Now she's on the phone  
Another one ringin' down the hall  
She's all alone  
That's the way she likes it y'all

She won't come around  
She won't come around  
For me

You're in baby's mind  
It's a long way from there to her heart  
She left it behind  
She don't finish what she starts

She won't come around  
She won't come around  
She won't come around  
For me
