"Demedicate Me"

Visit "[Demedicate Me](#)" on MotoLyrics.com

Well I'm tired of all your pills and maybe
I'm tired of your suggested doses
I'm tired of how I feel nothing
And I'm tired of these compressed emotions
So take these if you will and help me
Help me figure out what living life is

Demedicate me
And let the "healing" end
Demedicate me
Cause I want to feel again

This bottle in my hands is empty
But I'm filling up on resolutions
The plastic promises will never
Never take the place of real solutions
So take these if you can and help me
Help me figure out what living life is
