"The Other Side"

Visit "[The Other Side](#)" on MotoLyrics.com

Life and love and every choice set it front of you
You could say you've got it made, what you wanna do
But discontents and wanting more quiet on a cue
Tempting for the other side,
Fueling for a fire

Your eyes are looking weathered waiting
watching out while love is fading,
Tell me dear,
Are you alright?

Fiction fed the will has woken
Living lies while love is broken
Tell me dear,
Are you alright?

It's always greener on the other side
Don't take it for granted, trade your heart for lies

Silently you sing your song of "let me out"
Searching for a chance to change, just to let it out

But you could say you've got it made
You could say you've got it

What will it take for you to finally see
All that you have is all you'll ever need?
