Engage me  
Let me breathe the courage of your actions  
Don't hold back make it be for the good

The truth is  
I am not your cure but I can help you  
Find a way to reconcile the dark

Don't hold back  
Is there anybody out there feeling something?  
Don't hold back  
Is there anybody out there feeling something?

Stay right there  
Cause I want to watch you taking off your morning  
And putting on that midnight smile for me

You're chasing  
The slow motion belief that you are dreaming  
And running from the things that make you feel

Don't hold back  
Is there anybody out there feeling something?  
Don't hold back  
Is there anybody out there feeling something?
