Quiet is a cold

You and I both know

I don't need control

Need to fill the holes

Just a little soul

Easy as we go

That's a lot to know.

If easy come (if easy come)

Or easy goes (or easy goes)

You might be fast

I might be slow.

But I'm certain of the rhythm

Of this sound as we've been walkin'

Past the bridges on the river

And the way we stay together

And it shadows every other step

And then the lights caress

Alluminate your face and I just stop!

See the towers thrive

Light up on the stove

We are not so old

We have miles to go
We will take it slow
As the years unfold
That's a lot to know.
If easy come (if easy come)
Or easy goes (or easy goes)
You might be fast
I might be slow.
But I'm still certain of the rhythm
Of this sound as we've been walkin'
Past the bridges on the river
And the way we stay together
And it shadows every other step
And then the lights caress
Alluminate your face and I just stop
