How many invoices,
Will it take till we know,
That the integration model is all wrong.
How many SOs will we close,
Till we find,
That GulfTech has sold us a song?
How many times will TBase crash
Before we wake ourselves up.
How many recoveries will the Tools guys make,
Till all our users get fed up!
How many questions will Landya ask,
Before understanding seeps in.
How many faxes will Baan support send,
To give SSN his GIN.
The answer, my friend,
Is hidden in the code.
The answer is hidden in the code
